

FOR IMMEDIATE RELEASE

San Luis Diagnostic Center Renews MRI Accreditation

San Luis Obispo, California – December 8, 2009 – San Luis Diagnostic Center has been awarded a three-year term of accreditation in High-Field and Open MRI. As the first facility on the Central Coast to receive accreditation under the American College of Radiology's (ACR's) new, more stringent guidelines, San Luis Diagnostic Center demonstrates their commitment to the highest quality patient care.

The ACR awards accreditation to facilities for achieving high practice standards based on a evaluation of the practice by board-certified physicians and medical physicists who are experts in the field. The surveyors report their findings to the ACR's Committee on Accreditation, which subsequently provides the practice with a comprehensive report.

San Luis Diagnostic Center is a full-service imaging center. It not only provides a full range of ACR accredited services in High-Field and Open MRI, but is also the only facility in the county that can provide ACR accredited services in adult and pediatric CT, and oncological and brain PET/CT imaging. San Luis Diagnostic Center remains the Central Coast's only Breast Imaging Center of Excellence providing a full suite of accredited breast imaging services. In total, San Luis Diagnostic Center holds 9 ACR accreditations, more than any local facility.
